FLUFFO

FLUFFO IZO
sound insulating wall panels

DIRECTIONS FOR USE

The panels should not be exposed to direct, intense sunlight. After some time in such conditions colours might fade and discolorations may appear.

The panels should be installed away from open flames, sparks and other heat sources e.g. electric heaters.

The panels should not be installed in places with high humidity due to the absorptive nature of the foam they are made of.

The foam from which the panels are made may react with strong oxidizing agents (strong acids).

Be careful not to damage the panels with sharp objects, edges or corners of furniture.

Avoid staining the panels.

The panels should be installed out of reach of pets – the foam is not intended for consumpion. **ATTENTION!** Cats may use panels as scratchers.

CLEANING AND CARE INSTRUCTIONS

The Fluffo finish covering our panels is anti-static and does not attract dust. However, dust may still settle on the panels, just like on any furniture. In order to remove dust use a brush with soft bristles or a vacuum cleaner with a standard tip for cleaning upholstered furniture.

Lightweight stains can be removed with a soft sponge slightly moistened with diluted dishwashing liquid. When cleaning please wipe the whole panel surface, so that you don't leave rubbing traces in one spot. In extreme case, when the stain penetrated deep into the panel and is still visible despite the cleaning, the dirty panel can be easily replaced with a new one.

The panels can also be refreshed. First vacuum the panels thoroughly and then spray them with a water mist. Wait 2 minutes and wipe them with a dry sponge.

Be sure not to over rub the panel with a wet sponge and avoid strong detergents, such as bleach or washing powder.

The above information is based on our best knowledge, and serves only as a guideline. We are always happy to provide information and technical advice regarding our products. We reserve the right to make changes in our offer at any time. It is up to the customer to make sure that our panels' technical characteristics fit the purpose set by the customer. We will not take responsibility for the consequences resulting from non-compliance with our recommendations.
